THE ARTICLE

A leading poet and writer from Scotland has called for warnings to be put on books written by artificial intelligence (AI). Peter Mackay* became Scotland's national poet in December last year. He is concerned about the damage AI could do to the publishing industry. He wants food packaging-style health warnings on all AI-generated books. He told the BBC: "I have got huge concerns about AI in terms of the creation of new literature and the creation of new books, partly because, as a writer, it could be disastrous for new people who are in the profession." He added: "It's very hard to make a living as a writer anyway, and [now] you are having to compete with [all the] knowledge of every book written."

Mr Mackay wants all new books to have a special mark that shows whether AI or a person wrote it. He said the symbol could be like those used on food packaging. He believes the public needs to know about the level of AI input in a book. One idea is that information could show if a book is "100 per cent AI-free or 100 per cent organically produced". Mr Mackay's call comes just before the USA and UK refused to sign an international agreement on AI to keep it "clean" and "ethical". US Vice President JD Vance said too much regulation of AI could "kill a transformative industry just as it's taking off". He said "pro-growth AI policies" were more important than safety.

*Peter Mackay generally uses this English-sounding name. His real name is Pàdraig MacAoidh (in the Scottish Gaelic language).

WARM-UPS

1. A.I. BOOKS: Students walk around the class and talk to other students about A.I. books. Change partners often and share your findings.

2. CHAT: In pairs / groups, talk about these topics or words from the article. What will the article say about them? What can you say about these words and your life?

poet / warnings / books / publishing / food packaging / literature / A.I. / knowledge / symbol / the public / information / international agreement / ethical / growth / safety

Have a chat about the topics you liked. Change topics and partners frequently.

3. BAN: Students A **strongly** believe AI books should be banned; Students B **strongly** believe the opposite. Change partners again and talk about your conversations.

4. AI: How will AI change these industries? How will these changes affect workers? Complete this table with your partner(s). Change partners often and share what you wrote.

PUNCTUATE THE TEXT AND ADD CAPITALS

a leading poet and writer from scotland has called for warnings to be put on books written by artificial intelligence ai peter mackay became scotlands national poet in december last year he is concerned about the damage ai could do to the publishing industry he wants food packagingstyle health warnings on all aigenerated books he told the bbc i have got huge concerns about ai in terms of the creation of new literature and the creation of new books partly because as a writer it could be disastrous for new people who are in the profession he added its very hard to make a living as a writer anyway and now you are having to compete with all the knowledge of every book written

mr mackay wants all new books to have a special mark that shows whether ai or a person wrote it he said the symbol could be like those used on food packaging he believes the public needs to know about the level of ai input in a book one idea is that information could show if a book is 100 per cent aifree or 100 per cent organically produced mr mackays call comes just before the usa and uk refused to sign an international agreement on ai to keep it clean and ethical us vice president jd vance said too much regulation of ai could kill a transformative industry just as its taking off he said progrowth ai policies were more important than safety
