THE ARTICLE

From <https://breakingnewsenglish.com/2601/260112-hyundai-humanoid-robots.html>

The South Korean car maker Hyundai has announced plans to introduce 30,000 humanoid robots into its car plants. This will gradually take place over the next decade. The humanoids (called Atlas) are being manufactured by Hyundai's subsidiary Boston Dynamics. Atlas was unveiled at the Consumer Electronics Show in Las Vegas. Hyundai stated on its website that Atlas would advance human-robot collaboration. It added that the robot would assist in "evolving hardware-driven robotics into adaptive, artificial intelligence-driven robots designed to amplify human potential". Hyundai's vice-chairperson acknowledged that people could lose their jobs to Atlas, but some people would be needed to train it.

A life-sized Atlas was put through its paces on stage in Las Vegas. It wowed the audience with a flawless display of its dexterity. Its movements were incredibly human-like as it swivelled, swung its arms, marched around like a human, and demonstrated remarkable balance. Hyundai expects the humanoid robots to work side by side with human staff. The robots will collect data, learn movements, and improve through artificial intelligence software. A Boston Dynamics spokesperson said: "The convergence of robotics and AI represents more than a technological advancement. It is a transformative innovation that will make human life safer and more enriching."

WARM-UPS

1. HUMANOID ROBOTS: Students walk around the class and talk to other students about humanoid robots. Change partners often and share your findings.

2. CHAT: In pairs / groups, talk about these topics or words from the article. What will the article say about them? What can you say about these words and your life?

car makers / plans / car plants / the next decade / electronics / robot / potential / jobs stage / audience / dexterity / balance / human staff / software / robotics / innovation

Have a chat about the topics you liked. Change topics and partners frequently.

3. HUMANOID ROBOTS: Students A **strongly** believe humanoids will be essential in our future; Students B **strongly** believe the opposite. Change partners again and talk about your conversations.

4. HUMAN POTENTIAL: How might humanoids amplify human potential in these areas? How good would this be for you? Complete this table with your partner(s). Change partners often and share what you wrote.

	Human potential amplification	How good?
